

IMPORTANT MESSAGE - Please Read Carefully

Studco Building Systems Pty Ltd provides basic engineering services free of charge, so long as Studco branded products are exclusively used for the specified structure. If we discover that Studco branded products have not been used exclusively for the specified structure, we will forward an invoice to you for these engineering services, which will be payable immediately. The cost of engineering services varies widely, depending on the particular project requirements. Before undertaking any engineering services, we require your acceptance of the conditions stated above, by clicking the correct button below. Receipt of this completed form will be deemed overt acceptance of liability for engineering costs in the unlikely event that our products are not used exclusively in the specified structure and this form will be treated as purchase order should invoicing be required.

Please fill in the spaces provided below with as much information as possible. DATE:
