PRODUCT DESCRIPTION

A nogging is a horizontal bracing piece that is used in stud wall frames to prevent twisting of the studs during the installation of the lining boards. This form of bridging provides a strong rigid frame for the plasterboard and prevents cracks in the plasterboard joints. Noggings also provide extra support to the wall construction, and in some instances a more cost-effective design can be achieved by using noggings.

FEATURES

- Save time on installation.
- Range of nogging products to suit a variety of uses
- 0.70 BMT Noggings are approved for use in 1.15 BMT Stud Systems.
- Manufactured in Australia using high quality Australian steel.

INSTALLATION

- Slide studs in and fix to overcome twisting of studs.
- See Steel Stud – Noggings section of Wall & Ceiling Design & Installation Manual.
- See Installation Guide – Internal Stud Walls section of Wall & Ceiling Design & Installation Manual.
- See Installation Guide – HEDA Tough Wall System section of Wall & Ceiling Design & Installation Manual.
- See Installation Guide – Electrical & Plumbing Services section of Wall & Ceiling Design & Installation Manual.
- Installation Guide – Chase Walls section of Wall & Ceiling Design & Installation.

APPLICATION

Noggings can be used in a variety of applications including Chase walls, electrical and plumbing installations, internal and external wall systems.
